TROPICKS FRUIT ROLLS

TROPICKS FRUIT BALLS

## Top Innovation Thanks to our Impressive Sustainable Business Model:

HPW Fresh & Dry Ltd. is the largest employer in the rural Adeiso region in Ghana. We process 20 000 tons of fresh fruit and export 1600 tons of dried fruit yearly. Thanks to professional fruit sourcing in West Africa we can offer our customers high availability of all our products throughout the year. 1400 small farms and 1000 production workers profit from our relationship, our technical support and continuing education programs. HPW Fresh & Dry produces ecologically – using all fruit waste and solar panels for energy production. All production water comes from our own recourses and purified waste water.
